

Ø100 Standard Bottom Connection Thermo- Manometers

- Used for pressure measurement of liquids and gases.

Model No: **S10001**

Product Specifications

STANDARD FEATURES

Accuracy Class:	1,6
Mechanism:	Brass
Case:	Steel, chrome or black oven painted
Frame:	Steel, black oven painted, chrome or acrylic
Connection:	Brass 1/2 BSP (Other size threads on the request)
Pressure Unit:	Cu Sn 8 Bourdon Tube
Dial:	Aluminum, black division on white base or white division on black base
Temperature Range:	0-120C
Scale Range:	0-6 bar /psi 0-10 bar /psi

TECHNICAL DETAILS

Standard:	EN 837-1
Environment Temperature:	-20...+60°C
Warehouse Temperature:	-40...+70°C
Note :	Special manufacturing is required when used at temperatures up to 60 °C in soft soldering, up to 100 °C in hard soldering, and up to 200 °C at higher temperatures.
